# American Electric Power

American Electric Power (AEP) is one of the largest electric utilities in the United States, delivering electricity to more than 5 million customers in 11 states. AEP ranks among the nation's largest generators of electricity, owning more than 38,000 megawatts of generating capacity in the U.S. AEP also owns the nation's largest electricity transmission system, a nearly 39,000-mile network that includes more 765 kilovolt extra-high voltage transmission lines than all other U.S. transmission systems combined. The company is based in Columbus, Ohio.

AEP and GSI have partnered on field solutions since 2001 when AEP piloted GSI Facility Design for field design capture in support of its Itron LD-Pro system. AEP has implemented Field Design to more than 400 engineering technicians across its territory using Trimble GPS equipment supplied by GSI. In 2005, AEP and GSI partnered to develop GSI Storm Assessment, which interfaces with GE PowerOn outage management system.
