The Paperless Damage Assessment

Reduce the duration and costs of storm events.

1 Incident and Hazard Jumpstart

- Create incidents in the field as damage is found
- Import incidents from an Outage Management System (OMS) and assign to assessors

2 Rapid Damage Assessment

- Capture the location of damaged assets
- Communicate downed wires, crew, materials and equipment requirements to dispatchers

Executive Metrics

“Manage by the Numbers”

- Know what crews are needed
- Know when service will be restored
- Know how much the storm will cost

3 Clear Aggregated Assessment

- Create work and stores orders for crews
- View dashboards showing assessment by substation, service center, district, or operating company

4 Informed Decisions

- Prioritize and assign the right crews to the most affected areas
- Set proper expectations with customers, regulators, and employees

5 Outage Management System (OMS) Updates

- Integrate assessment data into existing restoration processes
- Close out and evaluate Incidents and Hazards upon restoration
